# Testing Myths.....!!

- Testing cannot be started if the product is not fully developed

- Testing ensures 100% Defect free product.

- Missed defects are due to Testers.

- Testers should be responsible for the quality of a product.

- Test Automation should be used wherever it is possible to use it and to reduce time.

- Automated testing is more powerful than manual testing

- Any one can test a Software application

- A tester's task is only to find bugs
